

Safeguarding Sarawak - Business Continuity and Risk Management in Post-COVID Era

23 June 2025

8.00 am - 12.00 pm

Mulu Auditorium, SCOPE

The COVID-19 pandemic was more than a health crisis—it was a stress test exposing global vulnerabilities for governments, businesses, and communities across the globe. In Sarawak, the pandemic revealed both the vulnerabilities and resilience of our systems, from palm oil to tourism, with brutal force. Remote communities faced logistics nightmares, while urban businesses scrambled to adapt. As we rebuild, the need for proactive, locally relevant business continuity and risk management strategies has never been clearer.

This session will unpack lessons from the pandemic, identify key risks facing Sarawak's public and private sectors, and outline practical business continuity strategies that can future-proof operations, protect livelihoods, and drive sustainable growth. This session goes beyond theory, offering Sarawak-specific strategies to:

- Fortify critical sectors against supply chain shocks
- Adapt business continuity frameworks for rural-urban operational realities
- Leverage local strengths (e.g., renewable energy, community networks) to build systemic resilience
